Aksa Yenilenebilir Enerji Üretim A.Ş. ("Aksa Yenilenebilir") :

Aksa Yenilenebilir Enerji Üretim A.Ş., formerly known as Aksa Aksen Enerji Ticaret A.Ş., was founded on 8 July 2015 as a 100% subsidiary of Aksa Enerji for electricity trading. As of 6 March 2023, the company's name was changed to Aksa Yenilenebilir Enerji Üretim A.Ş.

Aksa Energy Ghana:

Aksa Energy Ghana was founded on 15 July 2015 by the Aksa Enerji in accordance with the electricity production and sale agreement signed with the Government of Ghana Republic. As of the reporting date, unit of power plant with a capacity 192.5 MW of the fuel oil power plant with a total 370 MW capacity was temporarily approved and it started its operations on 10 April 2017. The installed power of the power plant has increased from 192.5 MW to 35 MW with a reserve capacity of total 280 MW as of 1 August 2017. As of 19 November 2018, the installed capacity of Ghana Fuel Oil Power Plant has increased from 280 MW to 370 MW and thus the guaranteed capacity has been increased from 223.5 MW to 332 MW. Aksa Energy Ghana, sells all of the electricity generated during the agreement to the Ghana Electricity Authority (ECG) on a tariff basis determined in terms of US Dollars ("USD"). As of 3 October 2022, the electricity sales contract was extended for 15 years.

In 2023, a 20-year U.S. dollar-denominated Power Purchase Agreement (PPA) was signed with the Electricity Company of Ghana for the establishment of the 350 MW Kumasi combined-cycle natural gas power plant, the generation of electricity, and the guaranteed sale of the electricity produced. As of 25 December 2025, the first phase of the power plant commenced partial commercial operation. As of July 2026, the plant was commissioned in simple-cycle mode with a capacity of 179 MW.

Aksa Enerji – Cyprus ("Aksa Enerji Y.Ş.")

On 10 June 2009, Aksa Enerji Y.Ş. signed an electricity sales agreement with the Cyprus Turkish Electricity Authority ("KIB-TEK") for the electricity to be produced from the diesel-generator units installed at the Kalecik power plant in the TRNC. The five-year contract signed with KIB-TEK in 2003 was extended on 1 April 2009 for an additional 15+3 years, until 2027, and further extended on 19 July 2023 with a 15-year lease and operation agreement, until 2038. During this period, Aksa Enerji Y.Ş. sells all the electricity it generates to the Cyprus Turkish Electricity Authority under a guaranteed purchase agreement, based on a tariff set in US Dollars.

In accordance with the capacity increase investments of Kalecik Power Plant in TRNC, the installed capacity has been increased by the instalment of two units with the same engine transferred from the power plants whose licenses were cancelled. The installed capacity of our TRCN Kalecik Power Plant has increased to 153 MW.

b) Financial Reporting in Hyperinflationary Economies

According to the Capital Markets Board (CMB) decision dated 28 December 2023, and numbered 81/1820, issuers subject to financial reporting regulations applying the Turkish Accounting/Financial Reporting Standards (TAS/TFRS) and capital market institutions are required to apply inflation accounting by implementing the provisions of TAS 29 "Financial Reporting in Hyperinflationary Economies" starting from the annual financial reports for the accounting periods ending on 31 December 2023. Based on this CMB decision, the announcement made by the Public Oversight Accounting and Auditing Standards Authority (POA) on 23 November 2023 and the updated "Implementation Guide on Financial Reporting in Hyperinflationary Economies" published on 16 January 2025, the Group has prepared its consolidated financial statements for period ending on 30 September 2026, by applying the TAS 29 Standard. According to this standard, the financial statements prepared based on the currency of a hyperinflationary economy must be presented in the purchasing power of that currency as of the balance sheet date, and the prior period financial statements must also be restated in the current measurement unit at the end of the reporting period. Therefore, the Group has also presented its consolidated financial statements as of 31 December 2025, based on the purchasing power as of 30 September 2026.

The adjustments made in accordance with TAS 29 have been carried out using the correction coefficient obtained from the Consumer Price Index ("CPI") for Türkiye, published by the Turkish Statistical Institute ("TURKSTAT"). As of 30 September 2026, the indices and correction coefficients for the current and previous periods used in the adjustment of the consolidated financial statements, since the cessation of the designation of the Turkish Lira as the currency of a high-inflation economy on 1 January 2005 are as follows:

Date	Index	Adjustment coefficient	Three-year cumulative inflation rates
30 September 2026	4,368.35	1.00000	158%
31 December 2025	3,513.87	1.24317	211%
30 September 2025	3,367.22	1.29732	222%

The main lines of TAS 29 indexation transactions are as follows:

- As of the balance sheet date, all items other than those stated in terms of current purchasing power are restated by using the relevant price index coefficients. Prior year amounts are also restated in the same way.
- Monetary assets and liabilities are expressed in terms of the purchasing power at the balance sheet date and are therefore not subject to restatement. Monetary items are cash and items to be received or paid in cash.
- Fixed assets, subsidiaries and similar assets are indexed to their acquisition values, which do not exceed their market values. Depreciation has been adjusted in a similar manner. Amounts included in shareholders' equity have been restated by applying general price indices for the periods in which they were contributed to or arose within the company.
- All items in the income statement, except for the effects of non-monetary items in the balance sheet on the income statement, have been restated by applying the multiples calculated over the periods when the income and expense accounts were initially recognised in the financial statements.
- The gain or loss arising on the net monetary position as a result of general inflation is the difference between the adjustments to non-monetary assets, equity items and income statement accounts. This gain or loss on the net monetary position is included in net profit.
- The impact of inflation on the Group's net monetary position in the current period has been recorded under the net monetary position gains/(losses) account in the consolidated income statement (Note 21).

Consolidated Financial Statements

The subsidiaries of the Group whose functional currency is other than the Turkish Lira have been translated into purchasing power as of 30 September 2026, according to the following principles.

The consolidated financial statements for the period ended 30 September 2026, have been translated into Turkish Lira using the closing exchange rate on 30 September 2026. The consolidated income statement for the period from 1 January 2026 - 30 September 2026, has been translated into Turkish Lira using the three-month average exchange rates and indexed to the purchasing power as of 30 September 2026. Similarly, the consolidated financial statements for the year ended 31 December 2025, have been translated into Turkish Lira using the closing exchange rate on 31 December 2025, and indexed to the purchasing power as of 30 September 2026. The income statement for the period from 1 January 2025 - 30 September 2025, has been translated into Turkish Lira using the three-month average exchange rates and indexed to the purchasing power as of 30 September 2026.

Comparative figures

Relevant figures for the previous reporting period are restated by applying the general price index so that the comparative financial statements are presented in the measuring unit applicable at the end of the reporting period. Information disclosed for prior periods is also expressed in terms of the measuring unit current at the end of the reporting period.

c) Basis of Measurement

Consolidated financial statements are prepared on the historical cost basis, excluding items measured at fair value as specified below:

- derivative financial instruments,
- financial investments,
- lands, land improvements, buildings and plant, machinery and equipments.

The methods used in fair value measurements are also disclosed in Note 19.

2.1. Basis of Preparation *(continued)*

d) Functional and presentation currency *(continued)*

Functional currencies are used to a significant extent in, or have a significant impact on the operations of the related Group entities and reflect the economic substance of the underlying events and circumstances relevant to these entities. All currencies other than the currencies selected for measuring items in the consolidated financial statements are treated as foreign currencies. Accordingly, transactions and balances not already measured in the functional currencies have been re-measured to the related functional currencies.

e) Basis of consolidation

(i) Business combinations

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from involvement with the entity and has the ability to affect those returns through it power over the entity. In assessing control, the Group takes into consideration potential voting rights that currently are exercisable.

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus
- if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When the excess is negative, a bargain purchase gain is recognised immediately in profit or loss. The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts generally are recognised in profit or loss.

(ii) Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls a business when exposure, or rights, to variable returns due to its involvement with the investee and the ability to use its power over the investee to affect the amount of the investor's returns. The financial statements of the subsidiaries are included in the consolidated financial statements using the full consolidation method from the date the control begins to the date the control ends. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

The Group measures any non-controlling interests in the acquiree at their proportionate share of the acquiree's identifiable net assets, which are generally at fair value.

Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as transactions with owners in their capacity as owners. Adjustments to non-controlling interests are based on a proportionate amount of the net assets of the subsidiary. No adjustments are made to goodwill and no gain or loss is recognised in profit or loss.

2 Basis of preparation of the consolidated financial statements *(continued)*

2.1 Basis of Preparation *(continued)*

e) Basis of consolidation *(continued)*

(iii) Loss of control

When the Group loses control over a subsidiary, it derecognizes the assets and liabilities of the subsidiary, and any NCI and other components of equity related to the subsidiary. Any resulting gain or loss arising on the loss of control is recognized in profit or loss. Any interest retained in the former subsidiary, then such interest is measured at fair value at the date when control is lost.

(iv) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment. Carrying value of shares owned by the Group and dividends arising from these shares has been eliminated in equity and profit or loss accounts.

f) Foreign currency

Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between the amortized cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortized cost in foreign currency translated at the exchange rate at the period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items in a foreign currency that are measured in terms of historical cost are translated using the exchange rate at the date of the transaction. Foreign currency differences arising on retranslation are recognized in profit or loss, except for differences arising hedge instruments recognized in other comprehensive income.

The EUR/TL, USD/TL, GHS/USD, TL/USD, USD/KZT and USD/UZS as of the end of the reporting periods are as follows:

	30 September 2026	31 December 2025
EUR / TL	55.5103	50.4532
USD / TL	48.9131	42.8623
GHS / USD	11.6842	10.4448
TL / USD	0.0204	0.0233
KZT/USD	439.37	502.57
UZS/USD	11,821	12,025

Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated to TL at exchange rates at the reporting date. The income and expenses of foreign operations are translated to TL at average exchange rates at the dates of the transactions.

.

2 Basis of preparation of the consolidated financial statements *(continued)*

2.1 Basis of Preparation *(continued)*

f) Foreign currency *(continued)*

***Foreign operations** (continued)*

Foreign currency differences are recognized in other comprehensive income, and presented in the foreign currency translation difference in equity. However, if the foreign operation is a non-wholly-owned subsidiary, then the relevant proportion of the translation difference is allocated to the non-controlling interests.

When a foreign operation is disposed of such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When the Group disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interests. When the Group disposes of only part of its investment in an associate or joint venture that includes a foreign operation while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

When the settlement of a monetary item receivable from or payable to a foreign operations is neither planned nor likely in the foreseeable future, foreign exchange gains and losses arising from such a monetary item are considered to form part of a net investment in a foreign operation and are recognized in other comprehensive income, and presented within equity in the foreign currency translation difference.

2.2 Summary of the accounting policies

The Capital Markets Board (CMB) has allowed public companies to apply either full set or condensed presentation for interim financial statements in accordance with TAS 34 "Interim Financial Reporting" standard. Accordingly, the Group has prepared its interim consolidated financial statements as of 30 September 2026, using the condensed presentation option.

In accordance with this communiqué, the disclosures and notes that should be included in the annual financial statements prepared in accordance with TAS / TFRS have been summarized or omitted in accordance with TAS 34. The attached condensed consolidated financial statements should be read together with the consolidated financial statements as of 31 December 2025, which have been audited by an independent auditor, and the related notes. Interim financial results should not be considered as indicative of the full-year results on their own.

The accounting policies applied in the preparation of these interim condensed consolidated financial statements are the same as those used in the most recent annual consolidated financial statements.

2.3 Changes in accounting estimates and errors

Changes in accounting estimates, if related to only one period, are applied prospectively in the current period in which the change is made. If related to future periods, the change is applied both in the period in which it is made and in future periods. Significant accounting errors identified are applied retrospectively, and prior period financial statements are restated. There have been no significant changes in accounting estimates for the Group during the current year.

2.4 New and amended Turkish Financial Reporting Standards

a) Amendments that are mandatorily effective from 2026

Amendments to TFRS 9 and TFRS 7	*Classification and Measurement of Financial Instruments*
Amendments to TFRS 9 and TFRS 7	*Power Purchase Arrangements*
Annual Improvements	*Annual Improvements to TFRSs – Volume 11*

Amendments to TFRS 9 and TFRS 7 *Classification and Measurement of Financial Instruments*

The amendments address matters identified during the post-implementation review of the classification and measurement requirements of TFRS 9 Financial Instruments. Amendments are effective from annual reporting periods beginning on or after 1 January 2026.

2.4 New and amended Turkish Financial Reporting Standards *(continued)*

a) Amendments that are mandatorily effective from 2026 *(continued)*

Amendments to TFRS 9 and TFRS 7 *Power Purchase Arrangements*

The amendments aim at enabling entities to include information in their financial statements that in the IASB's view more faithfully represents contracts referencing nature-dependent electricity. Amendments are effective from annual reporting periods beginning on or after 1 January 2026.

Annual Improvements to TFRSs – Volume 11

The pronouncement comprises the following amendments:
- TFRS 1: Hedge accounting by a first-time adopter
- TFRS 7: Gain or loss on derecognition
- TFRS 7: Disclosure of deferred difference between fair value and transaction price
- TFRS 7: Introduction and credit risk disclosures
- TFRS 9: Lessee derecognition of lease liabilities
- TFRS 9: Transaction price
- TFRS 10: Determination of a 'de facto agent'
- TAS 7: Cost method

Amendments are effective from annual reporting periods beginning on or after 1 January 2026.

The aforementioned standard, amendments and improvements do not have any significant effect on the Group's consolidated financial position and performance.

b) New and revised TFRSs in issue but not yet effective

The Group has not yet adopted the following standards and amendments and interpretations to the existing standards:

TFRS 17	*Insurance Contracts*
Amendments to TFRS 17	*Initial Application of TFRS 17 and TFRS 9 — Comparative Information*
TFRS 18	*Presentation and Disclosures in Financial Statements*
TFRS 19	*Subsidiaries without Public Accountability: Disclosures*
Amendments to TFRS 19	*Subsidiaries without Public Accountability: Disclosures*
Amendments to TAS 21	*Translation to a Hyperinflationary Presentation Currency*
Amendments to TAS 28	*Amendments to the Fair Value Option for Investments in Associates and Joint*

TFRS 17 *Insurance Contracts*

TFRS 17 requires insurance liabilities to be measured at a current fulfillment value and provides a more uniform measurement and presentation approach for all insurance contracts. These requirements are designed to achieve the goal of a consistent, principle-based accounting for insurance contracts. TFRS 17 has been deferred for insurance, reinsurance and pension companies for a further year and will replace TFRS 4 Insurance Contracts on 1 January 2027.

Amendments to TFRS 17 *Insurance Contracts* and *Initial Application of TFRS 17 and TFRS 9 – Comparative Information*

Amendments have been made in TFRS 17 in order to reduce the implementation costs, to explain the results and to facilitate the initial application

2 Basis of preparation of the consolidated financial statements *(continued)*

2.4 New and amended Turkish Financial Reporting Standards *(continued)*

b) New and revised TFRSs in issue but not yet effective *(continued)*

Amendments to TFRS 17 *Insurance Contracts* and *Initial Application of TFRS 17 and TFRS 9 – Comparative Information* *(continued)*

The amendment permits entities that first apply TFRS 17 and TFRS 9 at the same time to present comparative information about a financial asset as if the classification and measurement requirements of TFRS 9 had been applied to that financial asset before. Amendments are effective with the first application of TFRS 17.

TFRS 18 *Presentation and Disclosures in Financial Statements*

TFRS 18 includes requirements for all entities applying TFRS for the presentation and disclosure of information in financial statements. This standard is effective from annual reporting periods beginning on or after 1 January 2027.

TFRS 19 *Subsidiaries without Public Accountability: Disclosures*

TFRS 19 specifies the disclosure requirements an eligible subsidiary is permitted to apply instead of the disclosure requirements in other IFRS Accounting Standards. This standard is effective from annual reporting periods beginning on or after 1 January 2027.

Amendments to TFRS 19 *Subsidiaries without Public Accountability: Disclosures*

The amendments cover new or amended Turkish Financial Reporting Standards that were not considered when TFRS 19 was first issued. Amendments are effective from annual reporting periods beginning on or after 1 January 2027.

Amendments to TAS 21 *Translation to a Hyperinflationary Presentation Currency*

The amendments clarify how companies should translate financial statements from a non-hyperinflationary currency into a hyperinflationary one. Annual reporting periods beginning on or after 1 January 2027

Amendments to TAS 28 *Amendments to the Fair Value Option for Investments in Associates and Joint Ventures*

The amendments provide clarity about which entities are eligible to measure investments using the fair value option in TAS 28. Annual reporting periods beginning on or after 1 January 2027.

The Group evaluates the effects of these standards, amendments and improvements on the consolidated financial statements.

2.5 Significant accounting judgements, estimates and assumptions

Useful life of plant, property and equipment

Items of property, plant and equipment are depreciated from the date that they are available for use, or in respect of self-constructed assets, from the date that the asset is completed and ready for use. Depreciation is calculated on a straight-line basis over their estimated useful life. Depreciation is generally recognized in profit or loss unless it is included in the carrying amount of another asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group will obtain ownership by the end of the lease term. Land is not depreciated. On the other hand, the value increase amounts on the related fixed assets are transferred to the prior year's profit and loss.

Depreciation expense for the period of revalued land improvements, buildings and plant machinery and equipment is recognized in profit or loss. When the revalued lands, land improvements, buildings and plant machinery and equipment are sold or withdrawn from service, the remaining balance in the revaluation reserve is transferred directly to the prior years' losses. On the other hand, some of the increase in value is transferred to retained earnings as the asset is used by the entity.

2 Basis of presentation of the consolidated financial statements *(continued)*

2.5 Significant accounting judgements, estimates and assumptions *(continued)*

Useful life of plant, property and equipment (cont'd)

After initial recognition, the stripping asset is followed at cost less depreciation and impairment losses in the same way as the current asset of which it is a part. The stripping asset is depreciated systematically according to the production amount method over the expected useful life of the defined part of the ore deposit that is easier to access as a result of the stripping.

The estimated useful lives of the property, plant and equipments for the current and comparative periods are as follows:

	Years
Buildings	5 - 48
Land improvements	5 - 22
Machinery and equipment	2 - 40
Furniture and fixtures	2 - 50
Vehicles	2 - 25
Leasehold improvements	2 - 28

Power generation plants depreciated over shorter of license term and their useful lives. The Group depreciates its power generation plants in different useful lives in accordance to their different useful lives.

	Years
Fuel oil power plants	6 – 14
Dual fuel power plants	12
Natural gas power plants	20 - 40
Coal plants	37

Overhaul costs related to power generation plants have different useful lives, then they are accounted as separate items of power generation plants.

Depreciation methods and useful lives are reviewed at each reporting date and adjusted when necessary.

Calculation of loss allowance

When measuring ECL the Group uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

2.6 Comparative information and restatement of prior periods' consolidated financial statements

The Group's consolidated financial statements are prepared comparatively with the previous period in order to enable the determination of financial position and performance trends. In order to comply with the presentation of the current period consolidated financial statements, comparative information is reclassified when necessary and significant differences are explained. No reclassification has been made in the consolidated financial statements in the current year.

3 Operating segments

The Group's decision-making authority reviews the results and activities based on the geographical distribution of operations in order to make decisions regarding the allocation of resources to segments and to evaluate the performance of the segments. The geographical information presented below analyzes the Group's revenue, earnings before interest, tax, depreciation, and amortization (EBITDA), assets, and liabilities, considering the countries where the Group operates, specifically Türkiye, Africa, and Asia regions. In the presentation of this information, segment revenue and EBITDA are presented based on the geographical locations of customers, while segment assets and liabilities are presented based on geographical locations. The Group's decision-making authority is the executive board.

15 Taxation

Türkiye

Corporate tax

The Group is subject to corporate tax valid in Türkiye. Necessary provisions have been made in the accompanying financial statements for the estimated tax liabilities of the Group regarding the current period operating results. In Türkiye, the tax legislation does not permit a parent company and its subsidiaries to file a consolidated tax return. Therefore, provision for taxes shown in the consolidated financial statements reflects the total amount of taxes calculated on each entity that are included in the consolidation.

Corporate tax is applied on taxable corporate income, which is calculated from the statutory accounting profit by adding back non-deductible expenses, and by deducting dividends received from resident companies, other exempt income and other incentives (prior year's losses if any and investment incentives used if preferred) utilized.

The corporate tax rate applicable in Türkiye in 2026 is 25% (2025: 25%). Pursuant to Law No. 7582 dated 4 June 2026, the corporate tax rate applicable to income to be derived, effective from 1 January 2027, from the production activities of entities holding an industrial registry certificate and actively engaged in manufacturing has been reduced from 25% to 12.5%. Although the legislative amendment does not change the current period tax liability, it has been reflected in the deferred tax calculations included in the financial statements as of 30 September 2026 based on the tax rate expected to apply when the temporary differences are taxed in future periods.

15 Taxation *(continued)*

Corporate tax (continued)

On 15 July 2023, an amendment to the Corporate Tax Law abolished the 50% exemption on real estate capital gains. However, for properties acquired before the effective date of the amendment, the exemption continues to apply at a rate of 25%.

Under the Turkish taxation system, tax losses can be carried forward to offset future taxable income for up to five years. However, tax losses cannot be carried back.

In Türkiye, there is no procedure for a final and definitive agreement on tax assessments. Companies file their tax returns within four months following the close of the accounting year to which they relate. Tax returns remain open for examination for five years from the beginning of the year following the year in which they are filed. During this period, the tax authorities may audit the tax returns and the related accounting records and may issue reassessments based on their findings.

Under the provisional article added to the Tax Procedure Law ("TPL") by Law No. 7571 published in the Official Gazette dated 24 December 2025, it has been enacted that even if the conditions are met, the application of inflation adjustment based on the Producer Price Index (PPI) shall not be made for the 2025, 2026, and 2027 accounting periods. Accordingly, inflation adjustments have not been applied in the TPL financial statements that form the basis for corporate tax returns for these periods.

In Türkiye, the Domestic Minimum Corporate Tax came into effect with the laws published in the Official Gazette on 2 August 2024. The regulation will apply to corporate earnings for the 2025 taxation period.

Income tax withholding

There is a withholding tax obligation on dividend distributions, and this withholding obligation is accrued in the period when the dividend payment is made. A business or a corporate taxpayer who earns revenue through permanent representative in Türkiye and dividend payments to non-resident institutions other than those made in Türkiye are subject to withholding at the rate of 10%. In the application of the withholding rates regarding the dividend distributions made to non-resident companies and real persons, the withholding rates included in the related Double Taxation Agreements are also taken into consideration. Allocation of prior years' profits to the capital is not considered as profit distribution, therefore it is not subject to withholding tax.

Transfer pricing regulations

In Türkiye, the transfer pricing provisions have been stated under the Article 13 of Corporate Tax Law with the heading of "disguised profit distribution via transfer pricing". The General Communiqué on disguised profit distribution via Transfer Pricing, dated 18 November 2007 sets details about implementation.

If a tax payer enters into transactions regarding sale or purchase of goods and services with related parties, where the prices are not set in accordance with arm's length principle, then related profits are considered to be distributed in a disguised manner through transfer pricing. Such disguised profit distributions through transfer pricing are not accepted as tax deductible for corporate income tax purposes.

Tax applications for foreign subsidiaries of the Group

Turkish Republic of Northern Cyprus ("TRNC")

The applicable corporate tax rate in TRNC is 23.5% (31 December 2025: 23.5%).

Republic of Ghana

The applicable corporate tax rate in Republic of Ghana is 25% (31 December 2025: 25%).

Tax applications for foreign subsidiaries of the Group (continued)

Netherlands

Corporate income tax is levied at the rate of 20% (31 December 2025: 20%) on the worldwide income of resident companies, which is determined by modifying accounting income for certain exclusions and allowances for tax purposes for the year 2026. A unilateral decree for the avoidance of double taxation provides relief for resident companies from Dutch tax on income, such as foreign business profits derived through a permanent establishment abroad, if no tax treaty applies. There is an additional dividend tax of 5% computed only on the amounts of dividend distribution at the time of such payments.

Under Dutch tax legislation, tax losses can be carried forward to be offset against future taxable income for up to nine years. Financial losses can be offset against retained earnings for up to one year. Entities must file their tax returns within six months following the close of the tax year to which they relate, unless the company applies for an extension (normally an additional nine months). Tax inspection authorities, starting from the beginning of the year following the submission of the tax return, can examine the previous year's tax returns and the accounting records that are the basis for them and make a reassessment as a result of their findings for five years.

Republic of Mali

The applicable corporate tax rate in Mali is 35% (31 December 2025: 35%).

Madagascar

The applicable corporate tax rate in Madagascar is 20% (31 December 2025: 20%).

Uzbekistan

The tax rate on the worldwide income of entities resident in Uzbekistan is 15% (31 December 2025: 15%). For the year 2026, the corporate tax rate will be applied to the tax base, which is determined by adding non-deductible expenses according to tax laws and subtracting the exemptions specified in the tax laws from the commercial income of the entities. An additional 10% tax applies to dividend distributions, and this tax accrues in the period when the dividend payment is made.

Under the Uzbekistan taxation system, tax losses can be carried forward to be offset against future taxable income for limitlessly. Entities must file their tax returns within two months following the close of the tax year to which they relate, unless the company applies for an extension (normally an additional nine months). Tax inspection authorities, starting from the beginning of the year following the submission of the tax return, can examine the previous year's tax returns and the accounting records that are the basis for them and make a reassessment as a result of their findings.

Congo

The applicable corporate tax rate in Congo is 30% (31 December 2025: 30%).

The Group risk management

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included in Note 18 and 19.

Risk management framework

The Board of Directors of the Group has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board of Directors has established an Early Detection of Risk Committee responsible for developing and monitoring the Group's risk management policies.

The risk management policies of the Group are determined in order to identify and analyze the risks to be encountered, to determine the appropriate risk limits and to establish their controls, and to observe the risks and the dependency of the risks to the limits. Risk management policies and systems are regularly reviewed to reflect changes in the Group's activities and market conditions. The Group aims to develop a disciplined and constructive control environment in which all employees understand their roles and responsibilities through training and management standards and procedures.

Aksa Enerji Audit Committee audits the management in terms of compliance with the risk management policies and procedures of the Group and provides support during the fulfillment of the risk management framework depending on the risks exposed by the Group. The internal audit department makes regular and specific evaluations of risk management policies and procedures and reports the results to the Audit Committee.

Credit risk

The Group closely monitors customer credit risks in order to eliminate possible risks that may arise in the collection of trade receivables. Certain credit control procedures, credit rating system and internal control policies are used in the management of credit risk. The Group management covers these risks by limiting the average risk for the counterparty in each agreement and by obtaining guarantees if necessary. Foreign customer credit risks are related to public institutions and organizations with low collection risk, and guarantees are received for these customer credit risks.

Credit risk is the risk of financial loss to the other party as a result of one of the parties in a mutual relationship not fulfilling its obligations regarding a financial instrument.

The Group financial instruments also bears the risk of failure of the counterparty to fulfill the requirements of the agreement. The collection risk of the Group mainly arises from its trade receivables, Trade receivables are evaluated by taking into account the Group's policies and procedures, and accordingly, they are presented as net in the consolidated statement of financial position after making provision for doubtful receivables.

A proportion of the Group's trade receivables are receivables from EÜAŞ and TEİAŞ, and similarly, it has receivables arising from agreements with the governments or ministries of the countries in its operations in foreign countries. The Group takes part in a sector with low collection risk.

The Group manages the liquidity risk by maintaining the continuation of sufficient funds by regularly monitoring the cash flows and matching the maturities of financial assets and liabilities.

17 Financial instruments *(continued)*

Liquidity risk

Liquidity risk is the possibility of the Group not meeting its net funding liabilities. Occurrence of events that cause a decrease in fund resources such as deterioration in the markets or a decrease in credit score, cause liquidity risk. The Group management manages the liquidity risk by distributing the fund resources and keeping sufficient cash and similar resources to fulfill its current and possible liabilities.

The Group uses activity-based costing in costing its products and services, which helps to monitor cash flow needs and makes effective cash return on investments. The Group generally ensures that it has sufficient cash to cover financial and operational expenses, including the fulfillment of financial liabilities, excluding the potential impact of unreasonably foreseeable events such as natural disasters.

Market risk

Market risk is the changes that will occur in interest rates, exchange rates or the value of securities and other financial agreements and will affect the Group negatively. The main important risks for the Group are changes in currency and interest rates.

Foreign currency risk

Foreign currency risk arises from the Group's liabilities in USD and EUR and the changes in the value of Turkish Lira against USD and EUR.

The Group also has a foreign currency risk arising from its transactions. These risks arise from the Group's purchase and sale of goods in a currency other than the functional currency and using bank loans in foreign currency.

The Group aims to balance the exchange rate risk against foreign currency through derivative financial contracts.

The basis of the sensitivity analysis made in order to measure the currency risk is to make the total currency statement throughout the Group. Total foreign currency position includes all short-term and long-term foreign currency-based purchase and sale contracts and all assets and liabilities.

The Group is exposed to foreign exchange risk due to various income and expense items in foreign currencies and foreign currency payables, receivables and financial borrowings arising from these.

Interest rate risk

Within the scope of fund management, sensitivity analysis is performed in measuring the interest risk of interest sensitive assets in the portfolio. By determining the average maturity and interest rate of interest-sensitive assets, the sensitivity to changes in market interest rates is calculated, and the interest risk arising from the securities portfolio created within the scope of fund management by monitoring the markets is managed within the framework of the decisions taken to move, increase or decrease the existing securities portfolio in accordance with market interest rates expectations.

Capital management

The main purpose of the capital management of the Company is to provide a strong capital ratio in order to continue the operations of the Company and to increase the value it provides to the Company partners.

The Company manages the capital structure and makes the necessary arrangements according to the market competition conditions, economic conjuncture and growth strategy, In order to strengthen and regulate the capital structure, shareholders can make direct cash payments according to their working capital needs.

During the period, there has been no change in the Group's perspective on capital management.

Sensitivity analysis

The Group's currency risk generally consists of changes in the value of TL against EUR and USD. The basis of the sensitivity analysis made to measure the currency risk is to make the total currency statement throughout the entity. Total foreign currency position includes all short-term and long-term purchase contracts and all assets and liabilities based on foreign currency. The analysis does not include net foreign currency investments.

The Group realizes its medium and long-term loans in the currency of the project revenue it generates. For short-term loans, borrowings are made in TL, EUR and USD balanced under the pool/portfolio model.

Fair value risk of financial instruments with fixed interest:

The Group does not have financial assets and liabilities with fixed interest fair value difference reflected on profit or loss and hedging derivatives (forward interest rate swaps) registered under the accounting model for hedging purposes of fair value risk. Therefore, as of the reporting period, changes in interest rates will not affect profit or loss.

Cash flow sensitivity analysis for financial instruments with floating interest:

As of 30 September 2026, the impact of a 100 basis point change in interest rates on equity and profit or loss before tax is shown below. In this analysis, it is assumed that all other variables, particularly foreign exchange rates, remain constant. This analysis has been carried out in the same manner as of 31 December 2025.

Capital risk management

While managing the capital, the Group's goals are to maintain the Group's continuity of activity in order to maintain the most appropriate capital structure in order to provide return to its partners, benefit to other shareholders and to reduce the cost of capital.

The Group monitors capital using the net financial debt/equity ratio. Net financial debt is calculated by deducting cash and cash equivalents from the total financial debt amount.

Net debt/invested capital ratios as of 30 September 2026 and 31 December 2025 are as follows:

	30 September 2026	31 December 2025
Total financial liabilities	76,965,928,139	67,659,701,921

Fair value

Fair value refers to the price of a financial instrument subject to purchase and sale between willing parties in a current transaction, except in cases such as a forced sale or liquidation, Quoted market price, if any, is the value that best reflects the fair value of a financial instrument,

Foreign currency based financial receivables and payables are evaluated at the exchange rates valid on the date of the financial statement,

The following methods and assumptions have been used in estimating the fair values of the Group's financial instruments:

Financial Assets - The fair values of some financial assets include their cost values, cash and cash equivalents in the financial statements, interest accruals on them and other short-term financial assets, and due to their short-term nature, their fair values are considered to approximate their carrying values, The values of trade receivables carried, after deducting the provision for doubtful receivables, is considered to approximate their fair values,

Financial Liabilities - Due to the short-term nature of trade payables and other monetary liabilities, it is considered that their fair values approximate their carrying values, Fixed interest bank loans are expressed with discounted cost and transaction costs are added to the initial carrying values of the loans, Since the interest rates on floating rate loans are updated taking into account the changing market conditions, it is considered that the fair values of the loans represent their carrying value, Due to the short-term nature of trade payables, it is estimated that their fair values approximate their carrying values,

The Group classifies fair value measurements according to the source of the inputs of each financial instrument class, using a three-level hierarchy as follows:

Level 1: Valuation techniques using market prices traded in the active market

Level 2: Other valuation techniques involving direct or indirect observable input

Level 3: Valuation techniques that do not contain observable market inputs
